Subject: INVITATION: 2024 RMIS Workshop

Dear Program Committee Members,

We are pleased to invite you to participate and contribute to the forthcoming:

JRC/HaDEA Technical Workshop **“Channelling knowledge from European projects into the Raw Materials Information System (RMIS)”**
Hybrid event, October 9th and 10th, 2024

[REGISTER HERE](#)

NOT LATER THAN **September 26th**

The Raw Materials Information System (RMIS) is the EC's reference knowledge platform on non-food, non-energy raw material value chains from primary to secondary sources. The 2024 RMIS workshop is the 5th joint event and it continues the well-established and essential annual dialogue between the EC, HaDEA and EU-funded projects. In the context of the 2024 Critical Raw Materials Act and the COM on advanced materials, **the event will focus on knowledge related to critical, strategic and advanced materials (including how advanced materials can substitute for CRMs)**. The event is organised in two days.

The first day brings together key stakeholders and contributors to help identify the most relevant raw materials knowledge outputs from EU funded projects that can factually support the above-mentioned challenges, as well as to facilitate the integration of such outputs into the RMIS, towards increasing their visibility and relevance for policy support.

Considering the above focus areas, participants will have the opportunity to discuss:

- Ongoing scientific needs and challenges with leading experts from EC services and academia;
- How knowledge developed by the EC and its knowledge network supports the strengthening of the underlying raw materials knowledge base;
- How to facilitate technical dialogue (both IT and content-wise) for efficient knowledge transfers;

- How to increase awareness of project outputs and how best these can support identified policy priorities through RMIS;

The second day focuses on the opportunities of advanced materials to substitute critical and strategic raw materials, discussing the state of the art and supporting the development of a research agenda addressing four main sectors of application: energy, mobility, ICT and construction. The contributions to the workshop will focus not only on the research needs but also on key enabler of knowledge transfer and proper industrialisation of solutions.

Your physical participation is very much appreciated and welcome. We look forward to receiving your reply and we remain available for any further clarification.

Please be aware that **registration** to the event **is mandatory** if you wish to participate either as in-person or as remote participant!

Simone, Laura & Eleonora
On behalf of the RMIS/HaDEA team

The HE PC “Digital, Industry and Space” Secretariat (PK)
