

Call title: EDF-2024-RA-SIMTRAIN-BRG-STEP: Methods for bridging reality gaps – *Looking for consortium*

Call description: This call aims to explore technologies, concepts, products, processes and services towards a common simulation framework for wargames/combat simulations with the potential to facilitate reinforcement learning for mission planning and execution support.

Suggested organization: VIKI

The Defence Innovation Research Institute (VIKI) started its operation with the definite aim to be the hub of the defence innovation ecosystem of Hungary and be the engine of the development of dual-use technologies and products equally satisfying the needs of civil and military applications, and thereby help the Hungarian Defence Forces to increase its reactivity and resilience. VIKI's other ambition is to emerge as a regional leader in the international defence innovation ecosystem.

POC: Col (Ret.) Laszlo Dr Szatmari (szatmari.laszlo@defenseinnovation.hu)
